

# The Hideout

**APPROACH:** From Kyparissi, drive along the new road to Fokiano beach and Leonidio. Approximately 13km from where the road begins, just before the enormous parking area with the two oversized cairns of sector Kapsala, park on the side of the road (by an orange road sign approx. 50m before the large parking area). A small cairn marks the start of the trail. Walk down the very steep trail until you come to a section with fixed ropes and a small via ferrata. At the first portion of the via ferrata with metal rungs, there is also a fixed rope if you prefer to rappel down. Further along there are more metal rungs in the rock and fixed ropes to help you along the path, which continues to be steep and/or narrow throughout. **Walking time:** 15-20 mins.

*The approach is very exposed and it is for experienced climbers only. The approach and the crag are NOT suitable for families, children, or new climbers. Helmets must be worn at all times, including when approaching and leaving the crag.*
